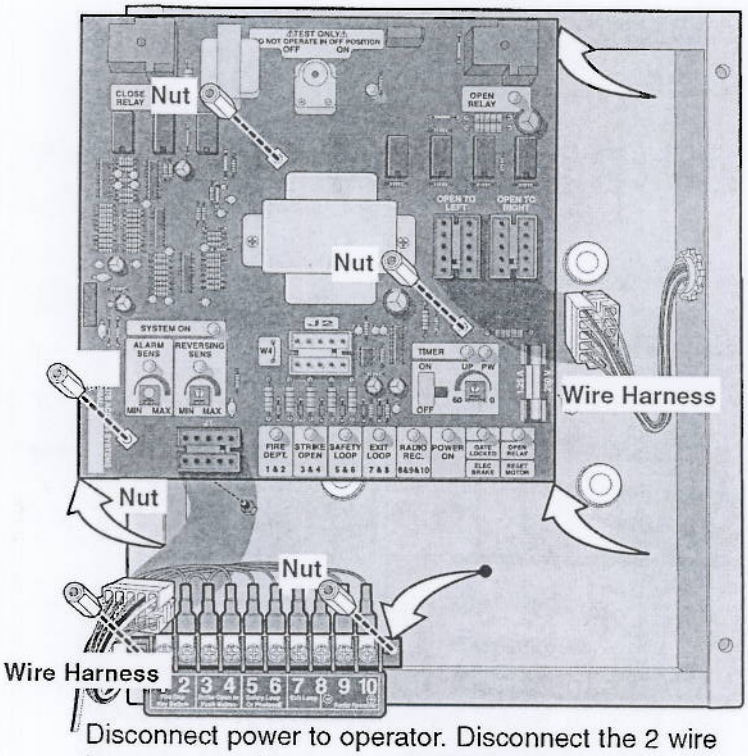
Upgrade to OmniControl™ Board

From the older style control board

Replacement of Board

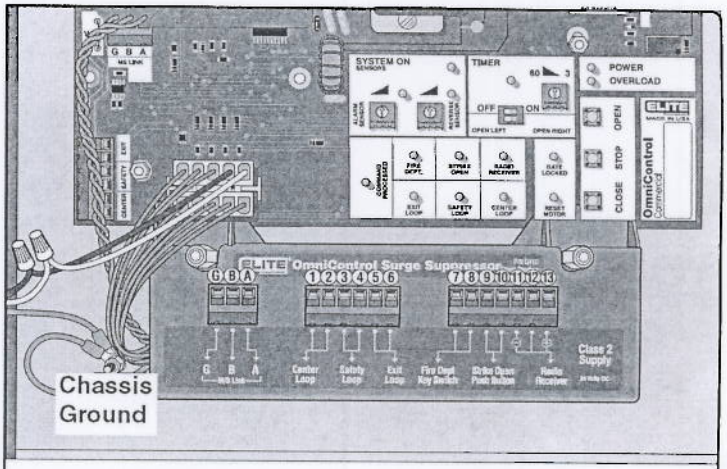


Disconnect power to operator. Disconnect the 2 wire harnesses and remove the old board by removing the 3 nuts. Remove the terminal connection strip by removing the 2 nuts. Reverse this process to install the OmniControl™ board.

⚠ WARNING

To prevent possible SERIOUS INJURY or DEATH from electrocution, disconnect electric power to operator BEFORE installing.

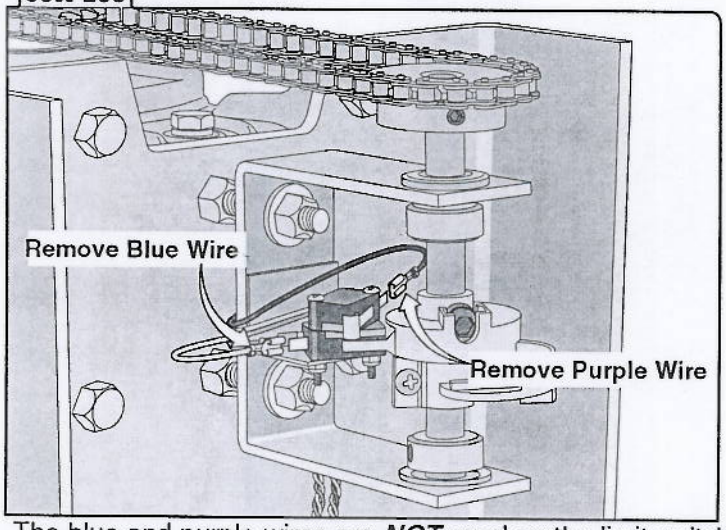
ALL electrical connections MUST be made by a qualified individual.



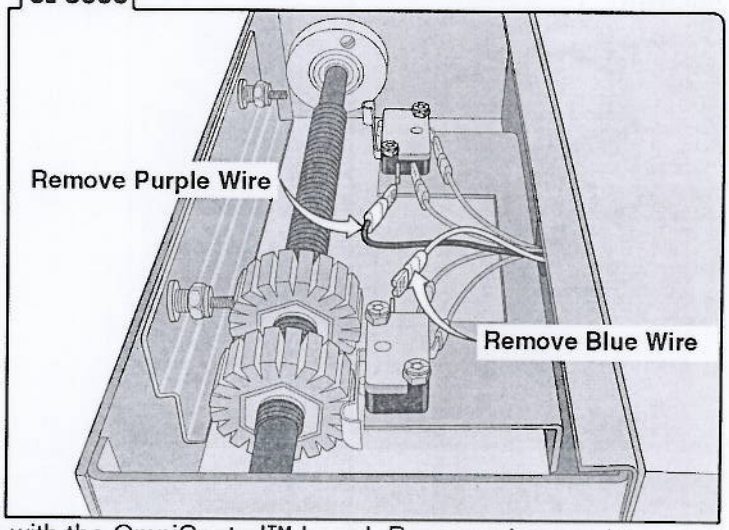
Caution Terminal connections for OmniControl™ are different than the existing board terminal connections.

Limit Switch Wiring

CSW-200



SL-3000



The blue and purple wires are ***NOT*** used on the limit switches with the OmniControl™ board. Reconnect power to operator after installation is complete.

CHAMBERLAIN ELITE™

Terminal Input Wiring Connections For the OmniControl™ bo
