Programming Security+® Remote Controls

Following is a set of instructions for programming your current remote control or adding an additional remote control.
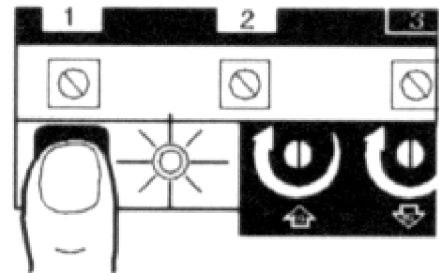

1 Locate the LEARN BUTTON on the back or side panel of the motor unit. You may need to remove a light cover or control panel cover to gain access. This button will be green and will have an LED indicator light next to it.

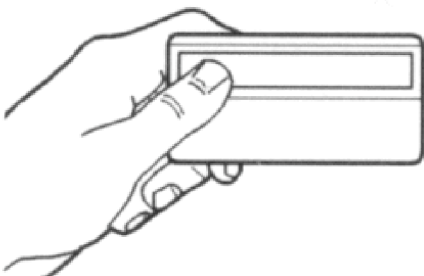

2 Press and release the LEARN BUTTON. The LED indicator light will glow steadily for 30 seconds.

3 Within this 30 second period, press and hold the button on the hand-held remote.

4 Release the button when the motor unit lights blink. It has learned the code. If light bulbs are not installed, two clicks will be heard.
